## **DETAILED ACTION**

### ***Application status***

The amendment to claims, filed on 06/23/2006, is acknowledged. Said amendment amended claims 4-7. Claims 1-10 are pending in the instant application.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 and 4-7, drawn to use of PTX3 or one of its functional derivatives for the preparation of a medicament for the treatment of bone or cartilage diseases.

Group II, claims 2, 3 and 8-10, drawn to a combination comprising PTX3 or one of its derivatives and TSG-6, and its various uses, i.e., for the preparation of a medicament for the treatment of bone or cartilage diseases.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression

"special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Mantovani et al. (WO/2002/36151, see IDS) teach the use of the long pentraxin PTX3 or a derivative thereof, for the preparation of a medicament for the prevention and treatment of autoimmune diseases such as arthritis (see page 15, lines 1-14), which anticipates claim 1, in the recitation of "use of PTX3 or one of its functional derivatives for the preparation of a medicament for the treatment of bone or cartilage diseases," and thus, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jae W. Lee whose telephone number is 571-272-9949. The examiner can normally be reached on 8:00-4:30.
